# INSTALLATION

1. When gluing laminate sheets vertically, it's important to take extra care to avoid the formation of air bubbles due to uneven pressure.
2. It's also important to avoid exposing the laminate to direct sunlight, as this can cause the colour to fade. Cracks at the corners can be caused by inadequate planning, packaging or improper transport conditions, so it's important to take precautions to prevent this.
3. To avoid these problems, don't use harsh chemicals to clean the laminate.
4. Also note that the actual colour of the laminate may differ from the sample supplied. If you take these factors into account and proceed with care, you can ensure the longevity and quality of your laminate panels.

## ADVANTAGES

WATER PROOF

EASY TO CLEAN

TERMITE & BORER  
PROOF

DURABILITY

90 DEGREE  
BENDABLE

EASY TO INSTALL

Please remove the protective film after 7 days after installation pvc HPL panels.
